

The Diversiboard Edge-to-Edge Advantage!

Touch Module

This 16:10 diagonal measurement assumes a 5" band along the top for the Touch Module.

		Dimensions			
		H	W	D	Wt.
Diversiboard 100"	Board and Active Area	56	85	.75	97
Diversiboard 96"	Board and Active Area	52	82	.75	77
Diversiboard 90"	Board and Active Area	48	77	.75	65

96" Active Area

Compliant with ALL interactive and standard projector solutions!

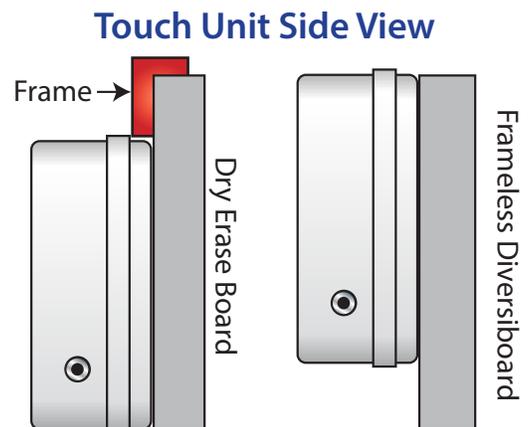

Diversiboard is the industry's ONLY frameless and 100% steel projection surface designed for interactive projection solutions!

When used with a module-based interactive projection system, the Diversiboard XL100 yields a usable image dimension of 96" diagonal at a 16:10 aspect ratio BELOW the module! Your installation is now easier than ever placing the "light curtain" and module on the same plane!

Diversiboard Advantage!

Considering that a framed projection surface can create both installation and usability issues, the illustration at right depicts the effect of a framed projection surface when a Touch Module is deployed. In this case, the magnetic Touch Unit can be easily attached to the same surface and it can be positioned HIGHER on the same plane as the projected image yielding even more active area.
